PROJECTS

Cheap Game Deals

- Developed a webpage using HTML, CSS, and JavaScript to help users find the best deals on games.
- Integrated the CheapShark API to dynamically link games and pricing information.
- Collaborated with a team to design and implement the user interface and functionality.
- GitHub: <https://github.com/kutho53/project1>

Hours Logger

- Developed a fast, efficient React application utilizing Vite for high-performance builds.
- Implemented TypeScript with strict linting to ensure code quality.
- Application allows users to log hours that they have worked and assign those hours to be billed to individual clients.
- GitHub: <https://github.com/kutho53/Project-3>

Weather App

- Developed a fast, efficient React application utilizing Vite for high-performance builds.
- Integrated two separate API calls to allow users to retrieve current and forecasted weather data by entering a city.
- API call function, current data, and forecast are organized into individual components to facilitate de-bugging.
- GitHub: <https://github.com/kutho53/WeatherSite>

EXPERIENCE

Walmart Perishable Distribution Center; Mebane, NC

Receiving / Maintenance Manager, July 2024 - Present

- Coordinated and directed a team of 20 associates.
- Led the team to efficiently receive the facility's highest single-day meat and produce volume on record.
- Built relationships with associates and provided clear and consistent guidance and feedback.
- Optimized workflow by setting up load layout to minimize congestion.
- Minimized waste by tailoring workforce to volume projection, adapted in realtime to match deviations.

PKL Services/Logmet LLC; Jacksonville, NC

Aviation Maintenance Operations Manager/Quality Assurance Inspector, June 2019 - June 2020

- Completed over 500 large and small-scale projects, leveraging relationship management to coordinate various departments, using creative problem solving and budget control strategies to create efficient solutions.
- Led process improvements through Lean process, Kaizen philosophy, and performance metrics analysis.

United States Marine Corps; Jacksonville, NC

USMC Sergeant /Aircraft Maintenance Operations Manager, July 2014 - June 2019

- Directed maintenance and large-scope repair projects for 21 USMC helicopters and assets valued at \$1.4 Billion.
- Trained, supported, mentored, and motivated 80 Marines in various specialties, leading to over 200 certifications.
- Spearheaded daily meetings with stakeholders and contributors, analyzing complex projects and translating broad objectives into clear and achievable milestones.

Apria Healthcare; Sacramento, CA

Oxygen Technician/Customer Service Representative, January 2023 – May 2024

- Managed over 1,100 patient equipment setups and services, using strong customer service and teaching skills to educate patients on use of equipment, resolve concerns, and restore trust in the company. Facilitated a 200% increase in company reputation on Google's review system during my tenure through excellent relationship building and customer service skills.

SKILLS

- Languages: JavaScript, TypeScript, HTML, CSS
- Frameworks/Libraries: React, Node.js, Express
- Tools/Platforms: Git, GitHub, Vite, MongoDB, REST APIs
- Project Management: Strong knowledge of Lean, Kaizen, Agile, Scrum, and Waterfall methodologies.
- Consummate team player and excellent communicator with strong executive presentation skills.
- Fast learner, hard worker, devoted, proactive and dependable. Strong track record of exceeding department goals.
